THE TOYO WAY

Company Philosophy

We will endeavor to continuously improve our products, and create value for everyone who we work with.

Our Mission

To create excitement and surprise with our products that exceed customer expectations and enriches society.

Our Vision

Our goal is to be company that:

- stays one step ahead of the future through constant technological innovation;
- drives entrepreneurial and creative spirit through a progressive culture; and
- shares in the enjoyment felt by everyone involved in our activities

TOYO TIRES has been producing premium high-performance tires for more than 75 years and is one of the top ten tire manufacturers in the world.

The company was founded in 1945, is based in Japan and has been producing tires and automotive technologies ever since.

In 2005, the TOYO TIRE Europe GmbH was founded with headquarters in Germany (Willich) to organise the Europe-wide sales of light truck-, van- SUV-, off-road- and 4x4-tires.

In 2019, the first European research and development centre opened in Germany.

Since then, TOYO TIRES has been testing and developing its tire technologies on European test and race tracks for later use on the road.

In 2022, the first European factory was opened in Serbia and a new holding company was founded.

TOYO TIRES continues to grow and is constantly developing new, modern and sustainable tire technologies for the current mobility society and for future generations.

PARTNER

TIRE BUSINESS

TESTING & DEVELOPMENT

The European R&D Center combines material research with technology development. Collected information and knowledge is shared with other R&D Centers of TOYO as well as with the Corporate Technology Center in Japan, where our tire technology is developed. Here we are improving our knowledge and advanced technologies, and we also carry out tire tests. Before starting to sell a new product to the market, we test tires in real conditions on test tracks. TOYO TIRES have two test sites in Japan.

Miyazaki

In the southeast of Kyushu Island, is the main proving ground where high speed and strength tests are conducted as well as measurement of noise levels. The proving ground also includes tracks for handling assessment and analysis of steering stability.

Saroma

Our winter test course is in Saroma, on the north island of Hokkaido. At this site, engineers can make real world measurements of operating characteristics in winter conditions. Traction, braking and handling on ice and snow are all evaluated using these tracks.

SUSTAINABILITY OF OUR TIRES

To reduce the carbon footprint of tire production while minimising environmental impact, TOYO TIRES utilises renewable, sustainable, and recycled materials, alongside solar energy in the manufacturing process.

At the 2024 Tokyo Motor Show, TOYO TIRES introduced its innovative concept tire, featuring 90% sustainable materials. This groundbreaking tire incorporates butadiene rubber derived from CO₂ emissions generated during production, turning a potential waste product into a valuable resource. Additionally, the carcass is crafted from bio-based polyester, while the steel belts and bead core utilise recycled steel.

We are passionately involved in premier automotive sports events worldwide, including the Dakar Rally and Endurance Racing, including the renowned Nürburgring 24h. Our dedication also encompasses challenging competitions like the Baja 1000 and the Pikes Peak Hill Climb, along with various major drift championships.

Participation in competitions allows us to test our products at the limits of performance. Experiencing tires in extreme conditions is crucial for driving material innovation, enhancing tire construction, and improving performance characteristics. The frequent victories of TOYO TIRES in competitive events demonstrate our commitment to quality and inspire us to continue advancing our technology.

The newly designed Proxes slick racing tires, used at the 24-hour race, utilise renewable materials including vegetable oils, sustainable silica from rice husk ash, and recycled wire in the bead core. These tires offer enhanced sustainability than earlier versions while delivering high speed and outstanding performance on the track.

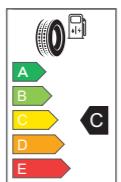

The knowledge and insights gained from motorsport are incorporated into the development of Toyo's next-generation sustainable road tires.

Sport is therefore deeply embedded in the brand identity of TOYO TIRES. We use new developments and innovations in technology to create products able to meet the high demands of a premium brand.

In order to provide standardised information on fuel efficiency, wet grip and external rolling noise, the European Union revised its compulsory label for all new tires, with effect from 1 May 2021. All relevant new tires must carry the revised EU label, which is intended to give end-users some essential information to help them when choosing new tires.

The QR code, read with a smartphone or other suitable reader, is intended to provide additional information:

1 Reduce environmental impact

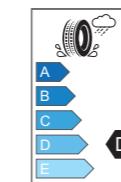

- Fuel efficiency / Rolling Resistance
 - Is expressed as 'rolling resistance'.
 - Rolling resistance directly impacts fuel consumption and the environment.

At lower rolling resistance, the tire dissipates less energy, contributing less to resistive forces and thereby reducing fuel consumption and CO₂ emission.

 The ICE grip pictogram applies to Nordic winter tires for use on iced surfaces.

2 Increase safety

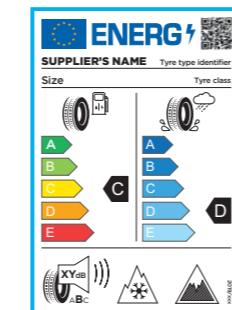

- Wet grip performance
 - Tires with excellent grip in the wet have shorter braking distances on wet roads.

The label displays a series of 5 classes, with tires with an "A" offering the highest wet grip and those with an "E" the lowest. Summer tires must be Grade E minimum.

 The SNOW grip pictogram represents tires for use in severe snow conditions.

3 Reduce noise production

- Exterior rolling noise (noise level measured in dB)
 - Graded A, B or C
 - A indicates the lowest grade for noise, B means a medium grade, while C is the noisiest possible grade.

PUBLISHED TIRE TESTS

The EU tire label is designed to show information regarding 3 criteria, however there are many other important performance factors to consider:

Test criteria	EU Tire Label	Tire Tests	TOYO TIRES
Dry conditions			
Braking	+	+	+
Driving stability	+	+	+
Handling	+	+	+
Wet conditions			
Braking	+	+	+
Driving stability	+	+	+
Handling	+	+	+
Aquaplaning	+	+	+
Steering	+	+	+
Tire / pattern noise			
Inside	+	+	+
Outside	+	+	+
Rolling resistance	+	+	+
Tire wear	+	+	+
O.E. test criteria	+	-	+

More information about tire labelling regulations as well as a list of FAQs is available from the European Commission : ec.europa.eu/energy/efficiency/tyres/labelling_en.htm

TECHNOLOGY AND PERFORMANCE

T-MODE

High-Efficiency and High-Precision Tire Development Platform

Over the years, TOYO TIRES has pioneered the development of vehicle-specific tires and ultra high-performance sport tires. Advanced polymer technology played a role in these breakthroughs, but they were also made possible by our proprietary virtual testing systems.

T-Mode, TOYO TIRES' latest form of this technology, uses computer simulation to virtually test vehicle-mounted tires in an array of driving conditions. Uneven tread wear, noise generation and a series of other factors are also analyzed. This data is then used to optimise tire design and enhance performance.

T-MODE

Nano Balance Technology

Fundamental Material Design Technology

Nano Balance Technology is a technology for developing ideal rubber materials with high precision through observation, prediction, material design, and production control, at the molecular (nano) level.

We use this to achieve a high level of both performance extremes, tire rolling resistance (low fuel consumption performance), and braking performance (wet grip performance), to offer a range of high value-added products. Moreover, we have launched a series of products made by using low fuel consumption tread that have excellent heat generation, based on the material design technology of Nano Balance Technology.

Nano Balance Technology

A.T.O.M.

Advanced Tire Operation Module

A.T.O.M. is a new production method to manufacture required parts and materials for tires.

In the conventional production method, tire parts such as wide section of treads are wound around a building drum and both edges are aligned and laminated together to make a green tire.

The section where the edges are laminated together is called a "joint." In contrast, the A.T.O.M. production method does not create joints as found in the conventional production method, and is referred to as "jointless."

Advanced Tire Operation Module

PROXES

The Proxes tire line is a high-performance summer tire range for a wide variety of vehicle classes - from small to powerful sports cars and premium sports coupes. The models are distinguished by excellent controllability and dynamism, pronounced water drainage properties and high performance.

CELSIUS

The Celsius All-Season tire range offers year-round performance without the inconvenience of having to change your tires over twice a year. Celsius tires are true all-rounders - delivering safety, control and comfort in all seasons and throughout the life of the tire.

OPEN COUNTRY

The Open Country range of tires are high-strength, durable tires, designed for Crossovers and SUVs. They are characterised by short braking distances, high off-road grip, durability and high levels of comfort.

OBSERVE

Observe tires are designed for winter conditions. Used for studded and studless winter tires, the brand name has now been applied to lamellae winter tires so it now encompasses the entire winter range. Synonymous with safety and mobility, Observe tires offer superb winter performance wherever it is needed.

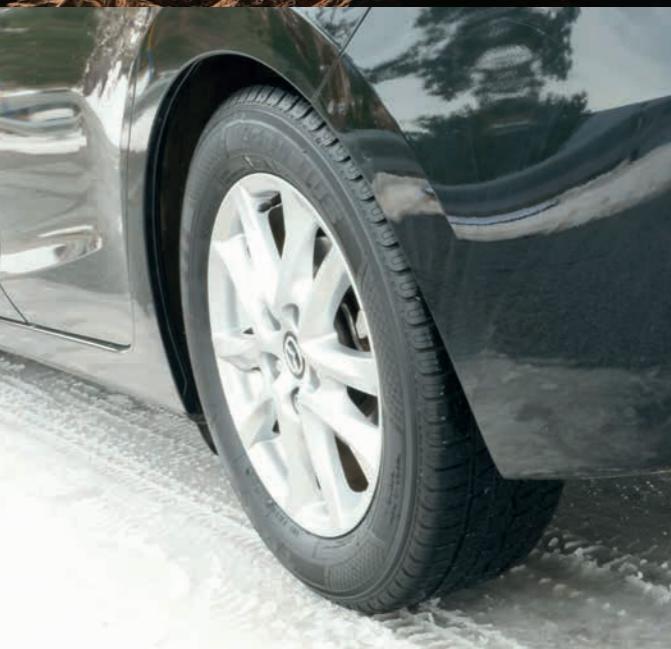

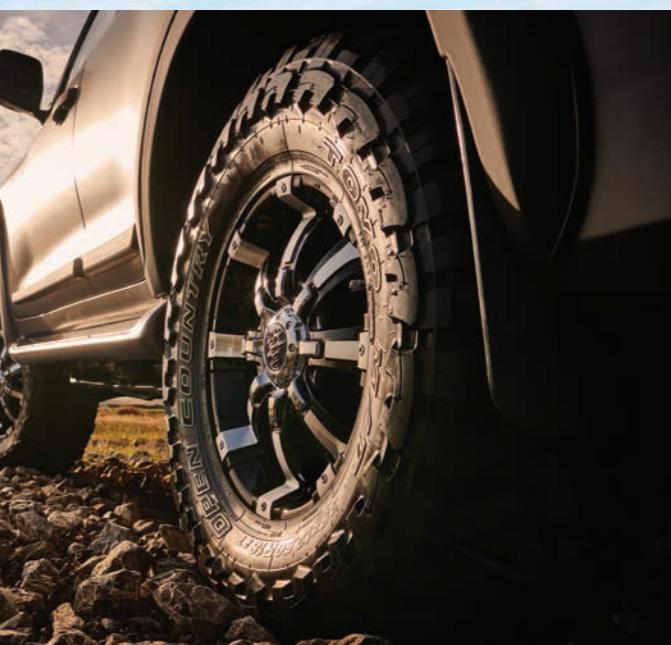

SNOWPROX

Snowprox is the name for the TOYO TIRES highway speed winter tire product range. Used to differentiate European winter tires from the more extreme versions, which are adapted to ice and snow covered roads in Scandinavia for example, the brand name will be phased out over the next few years. All new and replacement winter tires will bear the brand name "Observe".

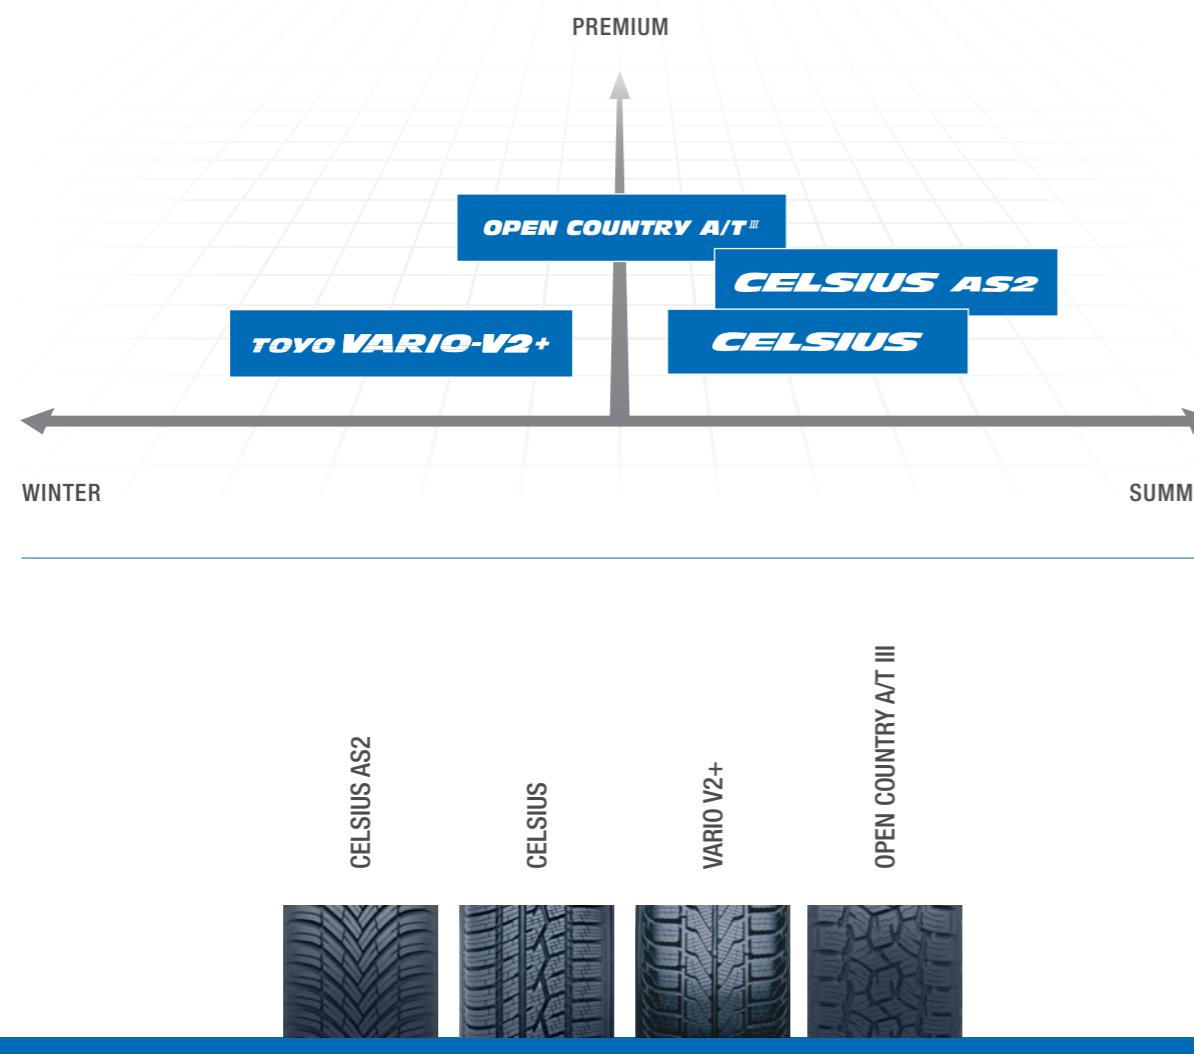

NANOENERGY

The NanoEnergy-line is specifically designed for commercial vehicles, offering exceptional wear resistance and longevity, along with a high level of fuel efficiency. This product line consists of a single model offered in a wide range of sizes.

CELSIUS AS2

The **CELSIUS AS2** is an all-season tire with a directional tread pattern, which can be driven both in summer and winter.

Its winter suitability is proven by the 3PMSF (snowflake symbol) on the side wall.

Both the tread and the rubber compound allow for grip and performance on dry and wet roads.

Tire Videos
TOYO Celsius AS2

16 - 19 inch. Speed index T, V and W.

Aspect Ratio 35 - 65. | Width 175mm - 275mm.

T-MODE Nano Balance Technology **A.T.O.M.**

Tread Pattern Features

Directional tread blocks with small sipes enhance traction and grip.

Directional grooves in the tread support the water/mud drainage and improve wet grip.

Small grooves in the tread blocks support the water drainage from the tread.

TOYO CELSIUS

CELSIUS

The **CELSIUS** tire features an innovative asymmetrical tread pattern, making it suitable for both summer and winter driving.

Its winter performance is certified by the 3PMSF (snowflake symbol) displayed on the sidewall, ensuring reliable traction in snowy conditions.

Designed for optimal grip and performance, the advanced tread and rubber compound provide excellent handling on both dry and wet roads.

M+S marked.

14 - 20 inch. Speed index T, H and V.

			A B C		
D - E	C	69 - 72	B	✓	-

Aspect Ratio 45 - 70. | Width 145mm - 235mm.

Tread Pattern Features

Asymmetrical tread pattern with large grooves ensure a good contact area and water evacuation.

Small rubber strips between the tread blocks improve grip on wintry roads and grip like claws on snow-covered roads.

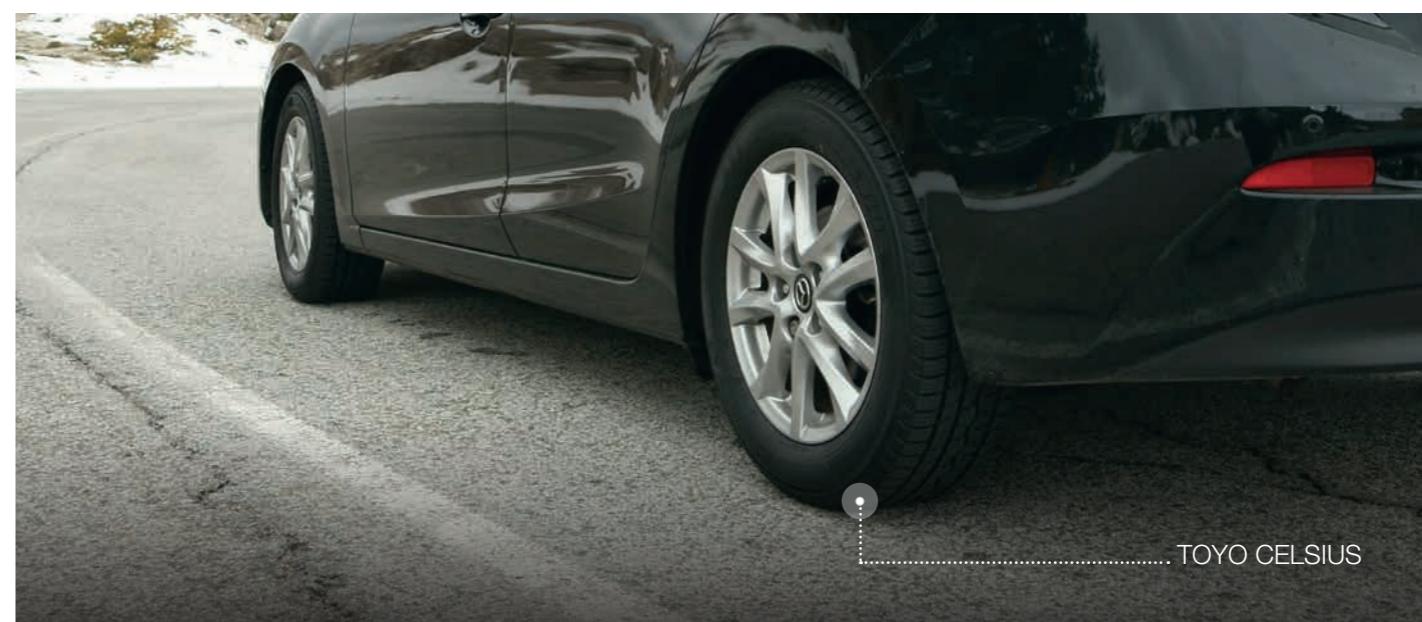

The tread blocks are covered with fine sipes, that provide traction and grip as well as a quick water drainage.

OPEN COUNTRY A/T III

The **OPEN COUNTRY A/T III** is an off-road tire with an asymmetrical profile that can be used in both summer and winter.

Its suitability for winter use is confirmed by the 3PMSF (snowflake symbol) on the sidewall.

The profile supports off-road driving, e.g. when used in forestry, but also on wintry and muddy roads.

M+S marked.

15 - 20 inch. Speed index S, T and H.

Aspect Ratio 50 - 82. | Width 195mm - 285mm.

Tread Pattern Features

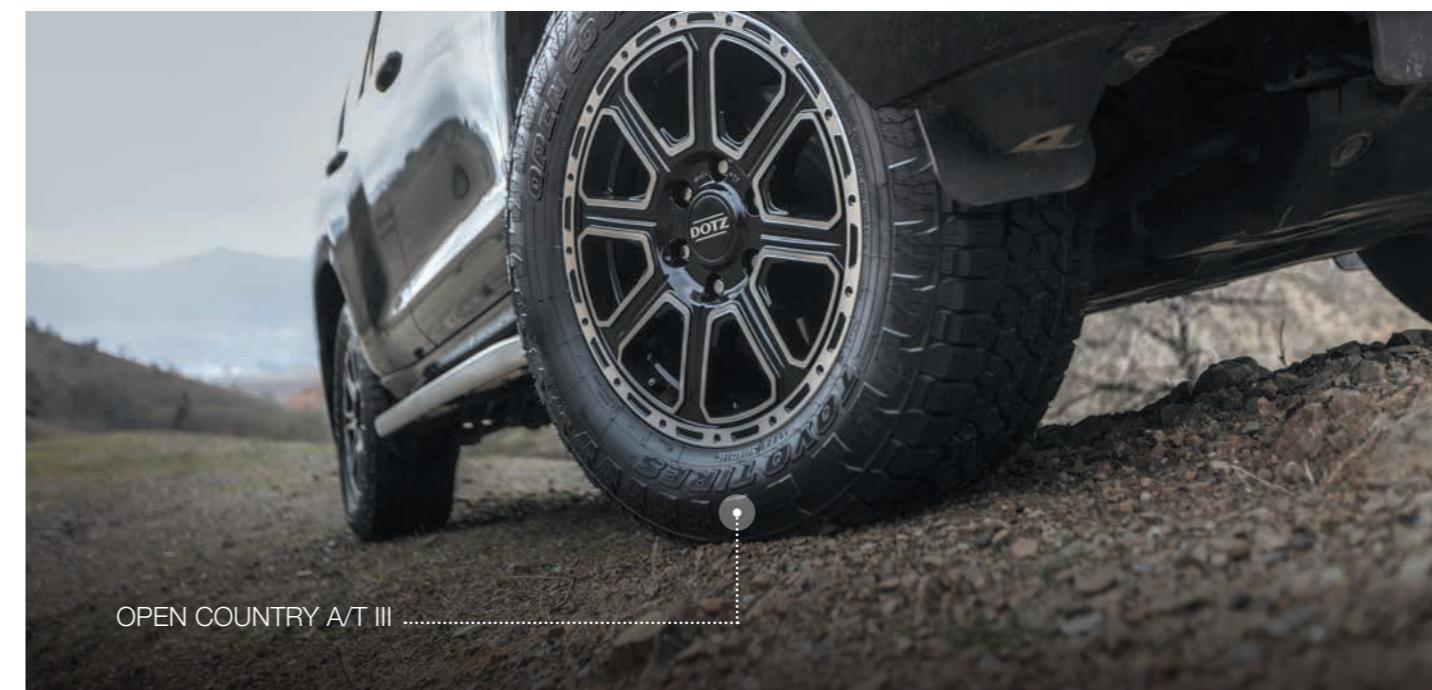

Equipped with numerous sipes and grooves on the tire shoulder, the tread design quickly disperses water and mud, providing consistent and strong road contact.

Wide tread blocks optimise the contact area.

Small blocks on the side wall improve movement on terrain.

OPEN COUNTRY A/T III

SUMMER CAR TIRES

PROXES SPORT 2

PROXES COMFORT

PROXES TR1

PROXES SPORT

OLD TIMER

PROXES Sport 2

The **PROXES Sport 2** is an ultra-high-performance tire for cars and SUVs with an asymmetrical tread pattern for high-powered and sporty vehicles. The tire enables precise handling even in corners.

Special Feature

The tread of the PROXES Sport 2 consists of two different rubber compounds. The outer shoulder has a stiff compound for improved handling performance and is optimised for dry surfaces.

The mixture on the inside is more flexible for improved wet grip and low-temperature performance.

17 - 22 inch. Speed index V, W and Y.

			ABC		
C - D	A	71 - 72	A - B	-	-

Aspect Ratio 30 - 60. | Width 205mm - 325mm.

Tread Pattern Features

Tread grooves in the shoulder area improve water drainage and wet grip.

Groove edges ensure excellent traction and reliable braking performance.

Straight circumferential tread grooves improve the handling in wet conditions.

PROXES SPORT 2

PROXES Comfort

The **PROXES Comfort** is a summer tire for passenger cars and SUVs with an asymmetrical tread design.

The tire impresses with its high driving stability in corners as well as good handling and very good grip performance in wet conditions.

Tire Videos
PROXES Comfort

16 - 19 inch. Speed index V and W.					
			A B C		
C - D	A	70 - 71	B	-	-
Aspect Ratio 45 - 70.			Width 205mm - 235mm.		

Tread Pattern Features

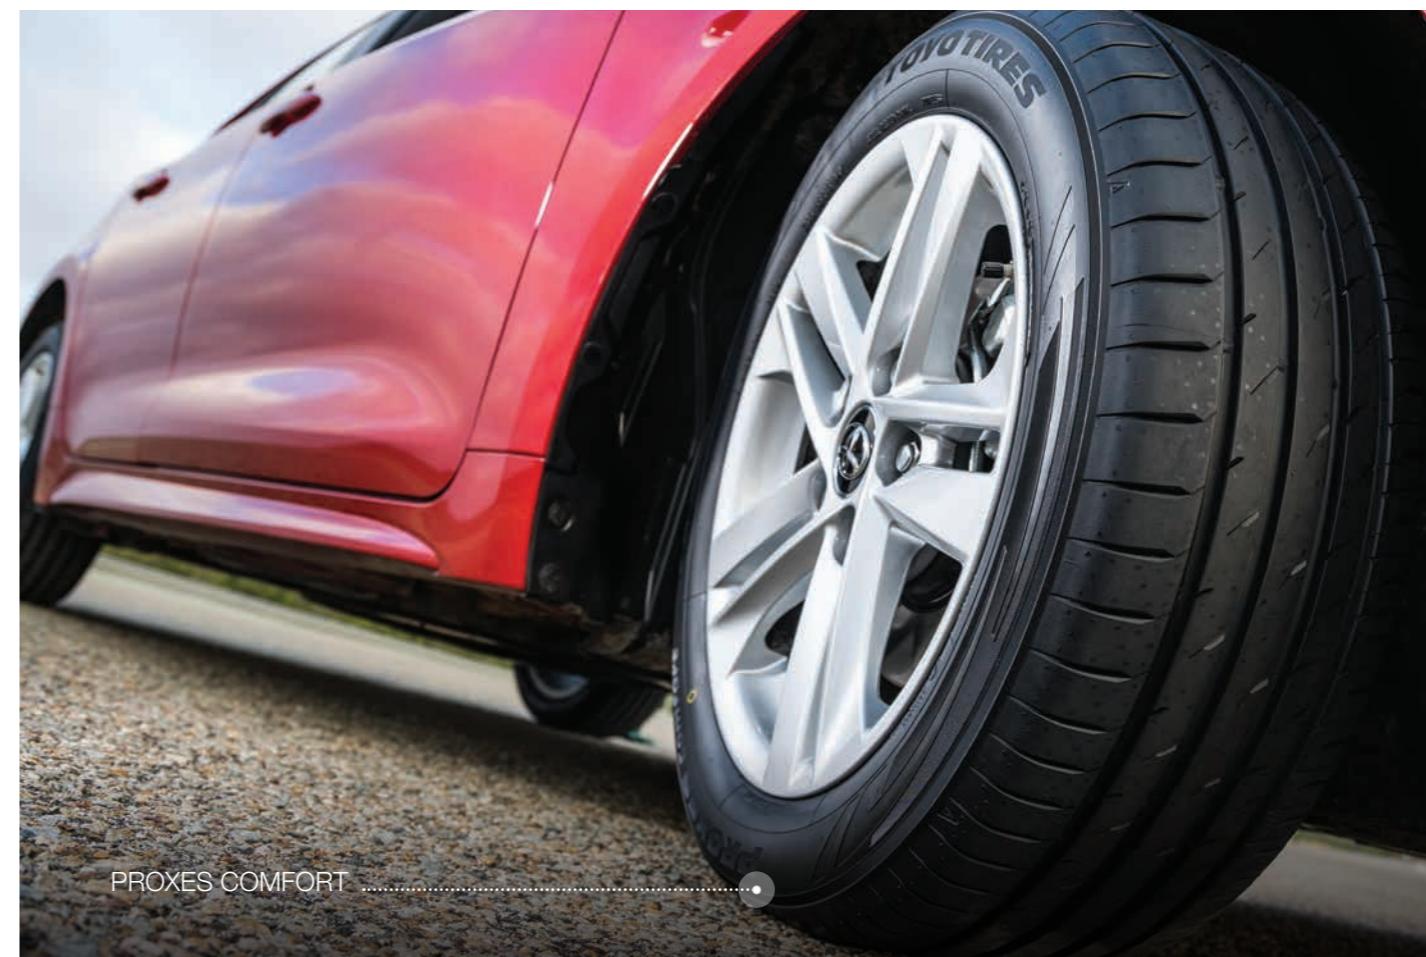

Asymmetrical tread pattern design with improved footprint.

Wide circumferential tread grooves with small lateral shoulder grooves for optimised water drainage.

Tight grooves in the tire shoulder drain water quickly and improve wet grip performance.

PROXES TR¹

The **PROXES TR1** has a directional tread pattern design.

Wide circumferential tread and shoulder grooves direct water away quickly and improve both handling and grip on wet and dry roads.

Tire Videos
PROXES TR1

15 - 20 inch. Speed index V, W and Y.

Aspect Ratio 35 - 60. | Width 165mm - 265mm.

Tread Pattern Features

Directional tread design.

Zigzag and "dynamic taper" design grooves drain water and improve wet grip performance.

Wide shoulder grooves allow for a good lateral water drainage.

PROXES Sport

The **PROXES Sport** features an asymmetrical tread pattern and a specialised Nano Balance compound, enhancing both handling and grip.

Wide circumferential and shoulder grooves efficiently channel water away, improving traction and control on both wet and dry surfaces.

Tire Videos
PROXES Sport

17 - 21 inch. Speed index W and Y.						
RATING	RATING	RATING	RATING	RATING	RATING	RATING
C - E	A - B	70 - 73	A - B	-	-	-
Aspect Ratio 25 - 55.	Width 205mm - 325mm.					

Tread Pattern Features

Asymmetrical tread design with transverse grooves in the midrib provide excellent traction.

The tread block design improves the contact patch of the tires as well as the handling and braking performance.

Wide shoulder grooves allow good lateral water drainage.

TOYO 310

Reintroduced for cars first registered before October 1 1990, TOYO 310 offers safe motoring and good mileage for classic cars.

14 - 15 inch. Speed indices S.

Toyo 310 is exempt from regulation EC 1222/2009 and UN/ECE-R117-02 as the tire is designed to be fitted only to vehicles first registered before 1 October 1990.

WINTER CAR TIRES

OBSERVE S944

SNOWPROX S954

SNOWPROX S943

OBSERVE GSi-6

OBSERVE ICE-FREEZER

OBSERVE G3-ICE

OBSERVE S944

The **OBSERVE S944** is a winter tire with a directional tread pattern.

It was designed using the Nano-Balance-Technology. The resulting tire construction ensures good grip on wet and wintry roads.

Tire Videos
Observe S944

16 - 19 inch. Speed index T, H, V and W.

Aspect Ratio 40 - 65. | Width 185mm - 235mm.

Tread Pattern Features

Stable interconnected centre blocks provide excellent road contact.

The tread blocks feature sipes that run in various directions, allowing a quick water drainage and maintaining optimal road contact.

Directional tread pattern with interconnected deep grooves quickly channel water away and prevent aquaplaning.

OBSERVE S944

SNOWPROX S954

The **SNOWPROX S954** is a winter tire featuring an asymmetric tread pattern.

Its design, combined with an optimised rubber compound, provides excellent grip on wet and icy roads.

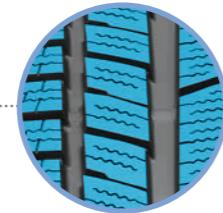

Tire Videos
Snowprox S954

16 - 21 inch. Speed index H, V and W.

Aspect Ratio 30 - 55. | Width 185mm - 275mm.

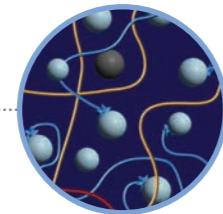

Tread Pattern Features

Tightly spaced tread blocks with many sipes and wide, circumferential tread grooves for optimum water drainage.

Asymmetrical tread design.

Silica tread compound for optimised rolling resistance and good grip.

SNOWPROX S954

SNOWPROX S943

SNOWPROX S943 is a winter passenger car tire for small and medium-sized vehicles. The optimised tread pattern and rubber compound deliver reliable grip on wet and wintry roads.

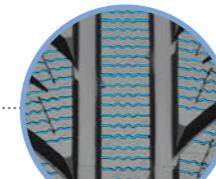

Tire Videos
Snowprox S943

16 inch. Speed index H.

Aspect Ratio 55 - 60. | Width 175mm - 235mm.

Tread Pattern Features

The tread blocks are interspersed with many small sipes that quickly drain the water into the circumferential tread grooves. The tire therefore offers good traction on snow and wet surfaces.

Wide shoulder blocks offer an extensive contact area, delivering excellent road grip and enhanced braking performance.

Two wide circumferential tread grooves quickly drain the water from the small tread block sipes, thereby improving grip on wet and wintry roads.

SNOWPROX S943

OBSERVE GSi-6

The **OBSERVE GSi-6** tire is a passenger car and SUV winter tire that has been specially developed for the Nordic regions, where the extreme winter temperatures create icy and snow-covered roads. The special rubber compound of the GSi-6 tire has been precisely matched to these extreme conditions.

Small pieces of walnut shell are mixed into the tire's rubber compound to provide additional grip on the road surface.

Tire Videos
Observe GSi-6

16 - 22 inch. Speed index H and V.

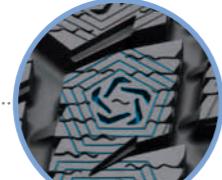

Aspect Ratio 35 - 70. | Width 185mm - 275mm.

Tread Pattern Features

A circumferential, centre tread block with fine sipes ensures good traction on snow with edge effect.

The 360° sipes, which give the tread block a special honeycomb structure with small, transverse grooves, improve grip on snow and icy roads.

A wave-shaped sipe runs along the centre tread blocks channeling water and improves road contact in winter conditions.

OBSERVE GSi-6

OBSERVE ICE-FREEZER

The **OBSERVE ICE-FREEZER** is a passenger car and SUV winter tire which has been specially developed for the extreme temperatures and weather conditions of the Nordic countries.

The tire has a directional tread pattern. Its special rubber compound and the additional studs in the tread provide good grip on snowy and icy roads.

Tire Videos
Observe Ice-Freezer

16 - 19 inch. Speed index T and H.

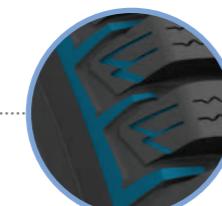

Aspect Ratio 45 - 65. | Width 195mm - 245mm.

Tread Pattern Features

Designed with a tree-shaped central tread block, this tire enhances traction and braking performance, especially on ice and snow.

With multiple sipes and grooves on the tire shoulder, the tread design ensures rapid water dispersion, maintaining strong road contact in winter conditions.

Pentagon-shaped spikes in the tread blocks provide additional grip and traction on icy and snow-covered roads.

OBSERVE G3-ICE

The **OBSERVE G3-ICE** is a passenger car and SUV winter tire that has been specially developed for the extreme weather conditions of the Nordic countries with both its rubber compound and tread pattern.

Tire Videos
Observe G3-ICE

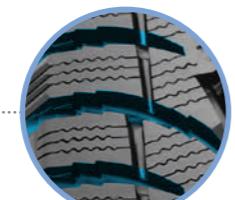

13 - 22 inch. Speed index Q, T and H.

D - E E 72 - 75 B ✓ -

Aspect Ratio 30 - 70. Width 175mm - 325mm.

Tread Pattern Features

The tire is designed with a V-shaped directional tread pattern that efficiently evacuates water. Additionally, spikes in the tread blocks provide increased grip and traction.

Wide tread grooves channel water to the sides and provide improved grip.

The sipes in the shoulder tread blocks extend to the tire sidewall in every second block, enhancing grip on the tire shoulder.

PROXES STIII

OPEN COUNTRY U/T

OPEN COUNTRY A/T PLUS

OPEN COUNTRY M/T

OPEN COUNTRY A/T III

The **OPEN COUNTRY A/T III** is an off-road tire with an asymmetrical profile that can be used in both summer and winter.

Its suitability for winter use is confirmed by the 3PMSF (snowflake symbol) on the sidewall.

The profile supports off-road driving, e.g. when used in forestry, but also on wintry and muddy roads.

M+S marked.

15 - 20 inch. Speed index S, T and H.

Aspect Ratio 50 - 82. | Width 195mm - 285mm.

Tread Pattern Features

Equipped with numerous sipes and grooves on the tire shoulder, the tread design quickly disperses water and mud, providing consistent and strong road contact.

Wide tread blocks optimise the contact area.

Small blocks on the side wall improve movement on terrain.

OPEN COUNTRY A/T III

PROXES Sport SUV

The **PROXES Sport SUV** features an asymmetrical tread pattern and a specialised Nano Balance compound, enhancing both handling and grip.

Wide circumferential and shoulder grooves efficiently channel water away, improving traction and control on both wet and dry surfaces.

17 - 23 inch. Speed index V, W and Y.

Aspect Ratio 30 - 65. | Width 215mm - 315mm.

Tread Pattern Features

Asymmetrical tread design with transverse grooves in the midrib provides excellent traction.

The tread block design improves the contact patch of the tire as well as the handling and braking performance.

Wide shoulder grooves allow for a good lateral water drainage.

PROXES ST™

The **PROXES STIII** has a sporty design and is a premium sports summer tire for SUVs.

The tire has a directional tread.

16 - 24 inch. Speed index V and W.

D	C - D	71 - 75	A B C	-	-

Aspect Ratio 25 - 65. | Width 215mm - 335mm.

Tread Pattern Features

AGGRESSIVE, DIRECTIONAL PROFILE

Directional tread blocks with high block stiffness reduce uneven wear and provide outstanding braking performance.

Parallelogram shaped tread blocks enhance the dry performance. The resulting grooves drain the water away quickly.

Arrow-shaped tips in the tread improve wet grip.

PROXES STIII

OPEN COUNTRY U/T

The **OPEN COUNTRY U/T** (Urban Terrain) has an asymmetrical tread pattern design and was designed for modern pickup and SUV vehicles.

The tire has a functional and innovative design, which provides good driving characteristics on dry and wet roads.

M+S Marked

16 - 22 inch. Speed index S, T, H, V and W.

				A-B-C		
D	C-D	70 - 72	A-B	-	-	-

Aspect Ratio 45 - 75. | Width 215mm - 285mm.

Tread Pattern Features

Tight tread blocks improve contact with the road and thus the grip.

Directing S-shaped diagonal grooves in the tire direct water away quickly.

Wide shoulder grooves quickly drain water away and provide improved grip.

OPEN COUNTRY U/T

OPEN COUNTRY A/T PLUS

OPEN COUNTRY A/T plus

The premium **OPEN COUNTRY A/T Plus** tire is an all terrain-tire with an asymmetric tread pattern.

Its aggressive sidewall is designed to enhance the style of SUV's.

M+S marked.

15 - 20 inch. Speed index S, T and H.

			A B C		
D	D	70 - 72	B	-	-

Aspect Ratio 45 - 85. | Width 205mm - 285mm.

Tread Pattern Features

Asymmetric tread pattern delivers excellent off-road traction while enhancing stability and braking performance, making it the perfect choice for adventurous drivers.

Open Groove-design ensures superior traction for off-road performance.

Step Block Edges deliver initial strong traction.

OPEN COUNTRY M/T

OPEN COUNTRY M/T

The **OPEN COUNTRY M/T** (Mud/ Terrain) is a high-performance off-road tire with asymmetrical tread.

The tread pattern extends into the tire sidewall, promoting forward movement in off-road conditions. Its aggressive design effectively channels mud and water away, improving grip on uneven surfaces.

POR - Professional Off-Road use.

Tire Videos
OPEN COUNTRY M/T

15 - 20 inch. Speed index P and Q.

Aspect Ratio 50 - 85. | Width 225mm - 315mm.

Tread Pattern Features

Wide tread blocks optimise the contact area.

The shoulder tread blocks incorporate bevelled edges that enhance the self-cleaning capability of the tread.

Small grooves in the tire blocks support rapid water drainage.

OPEN COUNTRY A/T III

OBSERVE S944 SUV

SNOWPROX S954 SUV

OBSERVE GSi-6 SUV

OBSERVE ICE-FREEZER SUV

OPEN COUNTRY A/T III

OPEN COUNTRY A/T^{III}

The **OPEN COUNTRY A/T III** is an off-road tire with an asymmetrical profile that can be used in both summer and winter.

Its suitability for winter use is confirmed by the 3PMSF (snowflake symbol) on the sidewall.

The profile supports off-road driving, e.g. when used in forestry, but also on wintry and muddy roads.

M+S marked.

15 - 20 inch. Speed index S, T and H.

			AC		
B - E	C - D	72 - 75	B	✓	-

Aspect Ratio 50 - 82. | Width 195mm - 285mm.

Tread Pattern Features

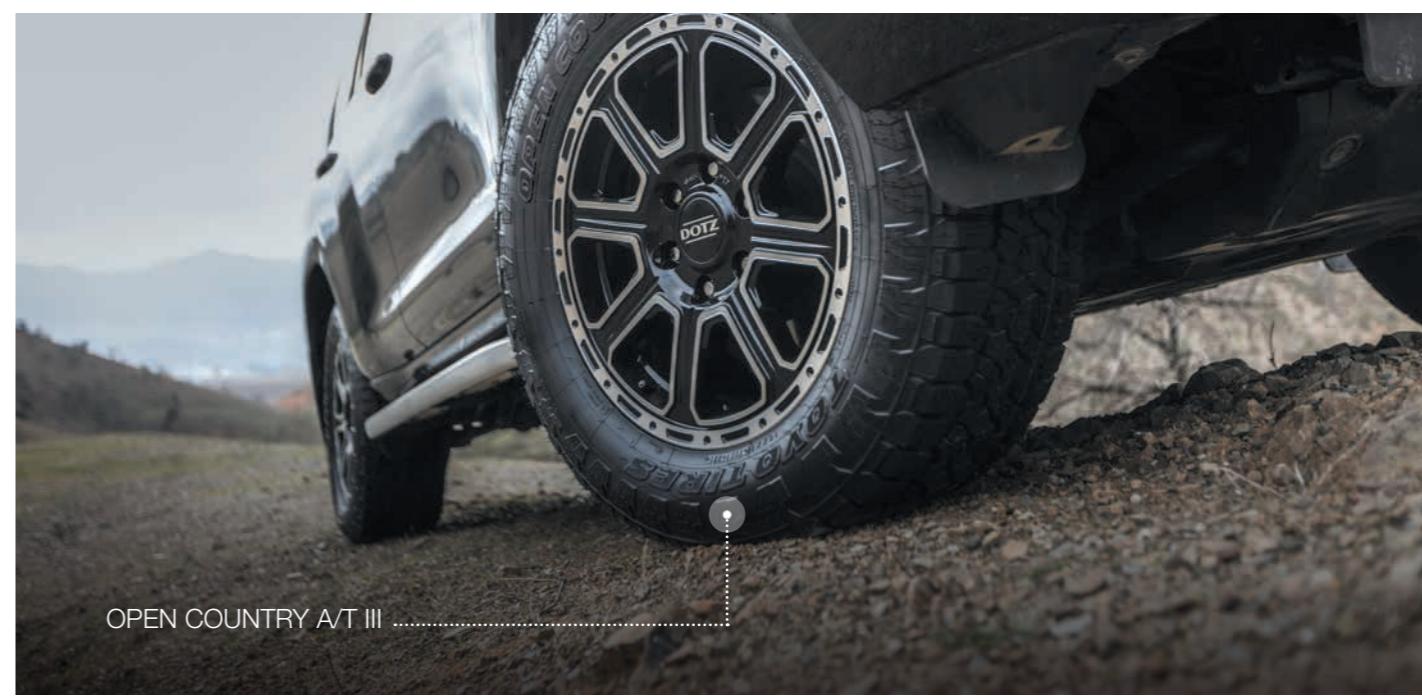

Equipped with numerous sipes and grooves on the tire shoulder, the tread design quickly disperses water and mud, providing consistent and strong road contact.

Wide tread blocks optimise the contact area.

Small blocks on the side wall improve movement on terrain.

OBSERVE S944

The **OBSERVE S944 SUV** is a winter tire with a directional tread pattern.

It was designed using the Nano-Balance-Technology. The resulting tire construction ensures good grip on wet and wintry roads.

Tire Videos
Observe S944

16 - 19 inch. Speed index H, V and W.

Aspect Ratio 50 - 70. | Width 215mm - 225mm.

Tread Pattern Features

Stable interconnected centre blocks provide excellent road contact.

The tread blocks feature sipes that run in various directions, allowing a quick water drainage and maintaining optimal road contact.

Directional tread pattern with interconnected deep grooves quickly channel water away and prevent aquaplaning.

SNOWPROX S954 SUV

The **SNOWPROX S954 SUV** is a winter tire featuring an asymmetric tread pattern. Its design, combined with an optimised rubber compound, provides excellent grip on wet and icy roads.

M+S marked.

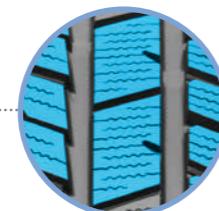

Tire Videos
Snowprox S954

16 - 21 inch. Speed index H, V and W.

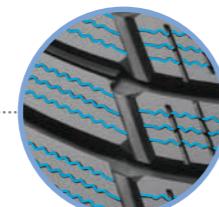

Aspect Ratio 30 - 70. | Width 205mm - 325mm.

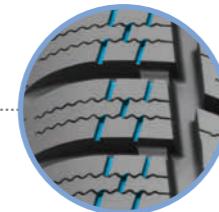

Tread Pattern Features

Tightly spaced tread blocks with many sipes and wide, circumferential tread grooves for optimum water drainage.

Asymmetrical tread design.

Silica tread compound for optimised rolling resistance and good grip.

SNOWPROX S954 SUV

OBSERVE GSi-6

The **OBSERVE GSi-6** tire is a passenger car and SUV winter tire that has been specially developed for the Nordic regions, where the extreme winter temperatures create icy and snow-covered roads. The special rubber compound of the GSi-6 tire has been precisely matched to these extreme conditions.

Small pieces of walnut shell are mixed into the tire's rubber compound to provide additional grip on the road surface.

M+S marked.

Tire Videos
Observe GSi-6

16 - 22 inch. Speed index H and V.

Aspect Ratio 35 - 75. | Width 215mm - 315mm.

Tread Pattern Features

A circumferential, centre tread block with fine sipes ensures good traction on snow with its edge effect.

The 360° sipes, which give the tread block a special honeycomb structure with small, transverse grooves, improve grip on snow and icy roads.

A circumferential, wave-shaped sipe runs through the entire centre tread block and also drains water to improve contact with the road in winter.

OBSERVE GSi-6 SUV

OBSERVE ICE-FREEZER SUV

The **OBSERVE ICE-FREEZER** is a passenger car and SUV winter tire which has been specially developed for the extreme temperatures and weather conditions of the Nordic countries.

The tire has a directional tread pattern. Its special rubber compound and the additional studs in the tread provide good grip on snowy and icy roads.

Tire Videos
Observe Ice-Freezer

16 - 20 inch. Speed index T and H.

Aspect Ratio 50 - 70. | Width 215mm - 265mm.

Tread Pattern Features

The tree shaped centre tread block improves traction and braking performance on ice and snow.

The tread pattern has many sipes and grooves on the tire shoulder, which drain water away quickly so that the tire maintains good contact with the road surface in winter.

The spikes in the tread blocks provide additional grip on icy and snow-covered roads.

NANOENERGY VAN

OBSERVE VAN

OBSERVE ICE-FREEZER VAN

The **OBSERVE ICE-FREEZER** is a winter van tire which has been specially developed for the extreme temperatures and weather conditions of the Nordic countries.

The tire has a directional tread pattern. Its special rubber compound and the additional studs in the tread provide good grip on snowy and icy roads.

M+S marked.

15 - 17 inch. Speed index R.

			A B C			-
E	E	72	B	✓		

Aspect Ratio 60 - 75. | Width 185mm - 235mm.

Tread Pattern Features

Designed with a tree-shaped central tread block, this tire enhances traction and braking performance, especially on ice and snow.

With multiple sipes and grooves on the tire shoulder, the tread design ensures rapid water dispersion, maintaining strong road contact in winter conditions.

The pentagon-shaped spikes in the tread blocks provide additional grip and traction on icy and snow-covered roads.

CELSIUS CARGO

The **CELSIUS CARGO** features an innovative asymmetrical tread pattern, making it suitable for both summer and winter driving.

Its winter performance is certified by the 3PMSF (snowflake symbol) displayed on the sidewall, ensuring reliable traction in snowy conditions.

Designed for optimal grip and performance, the advanced tread and rubber compound provide excellent handling on both dry and wet roads.

M+S marked.

Tire Videos
Celsius Cargo

14 - 17 inch. Speed index R, S, T and H.

C - E C 72 B ✓ -

Aspect Ratio 55 - 75. Width 175mm - 235mm.

Tread Pattern Features

The asymmetrical profile design uses fine sipes within the tread blocks to rapidly channel water away and provide excellent traction.

Wide grooves between the tread blocks support water and mud drainage and improve wet grip.

Small rubber strips between the tread blocks enhance winter road traction, gripping snowy surfaces securely like claws.

NANOENERGY VAN

The **NANOENERGY VAN** is a reliable and economical summer tire for vans, offering shorter braking distances, enhanced stability, and a reinforced carcass for durability. Lower fuel consumption ensures cost-effective performance.

13 - 17 inch. Speed index Q, R, S, T and H.

			ABC		
C - D	B - C	70	B	-	-

Aspect Ratio 55 - 75. | Width 165mm - 235mm.

Tread Pattern Features

High rib stiffness and less wear through double zigzag ribs.

The 3D Multi wave sipes decrease the block movement for better cornering behaviour.

Dynamic Taper guarantees enhanced traction to the road surface.

OBSERVE VAN

T-MODE

Tread Pattern Features

Wave-shaped centre profile blocks enhance rib stiffness and improve edge performance for reliable traction on winter roads.

Wide shoulder blocks with enhanced stiffness provide maximal road contact and reduced wear.

3D multi-wave sipes drain water quickly and reduce the risk of aquaplaning.

OBSERVE VAN is the van tire for normal winter conditions, offering a symmetrical tread pattern and a special rubber compound, designed with Nano-Balance-Technology.

The optimised tread block design provides excellent mileage and reliable grip on wet and winter roads. The reinforced carcass ensures durability, making it a robust choice for vans.

COMPETITION TIRES

PROXES R888R

PROXES R888R

PROXES R888R is a semi-slick sports tire with an asymmetrical tread pattern.

The tire is certified for street use, making it suitable for both road and track driving. It provides excellent dry grip and responsive steering characteristics.

CAUTION:

The rubber compounds used in these tires have unique properties that can cause them to lose some of their flexibility when used or handled in temperatures below -9°C. This loss in flexibility can lead to potential cracking and other damage to the tire.

To minimise the chances of this happening, consumers and installers are advised to follow the instructions below:

1. Do not move or operate a vehicle fitted with these tires in temperatures below -9°C.
2. Avoid moving these tires in temperatures below -9°C
3. Before mounting or dismounting, store these tires for at least 24 hours in a temperature controlled environment of 20°C or warmer and always inspect for signs of cracking before mounting. Never use tires that have cracked.
4. Remove the wheels from the vehicle and deflate the tires to half the normal air pressure during prolonged periods of inactivity or for storage.
5. Aquaplaning and wear are good for a competition tire but are inferior to a normal road tire. Because of this, PROXES R888R is not recommended for everyday road use.

For best performance, PROXES R888R should be changed after two seasons maximum, irrespective of wear.

Tire Videos
Proxes R888R

13 - 20 inch. Speed index V, W and Y.

Aspect Ratio 30 - 60. | Width 185mm - 315mm.

Tread Pattern Features

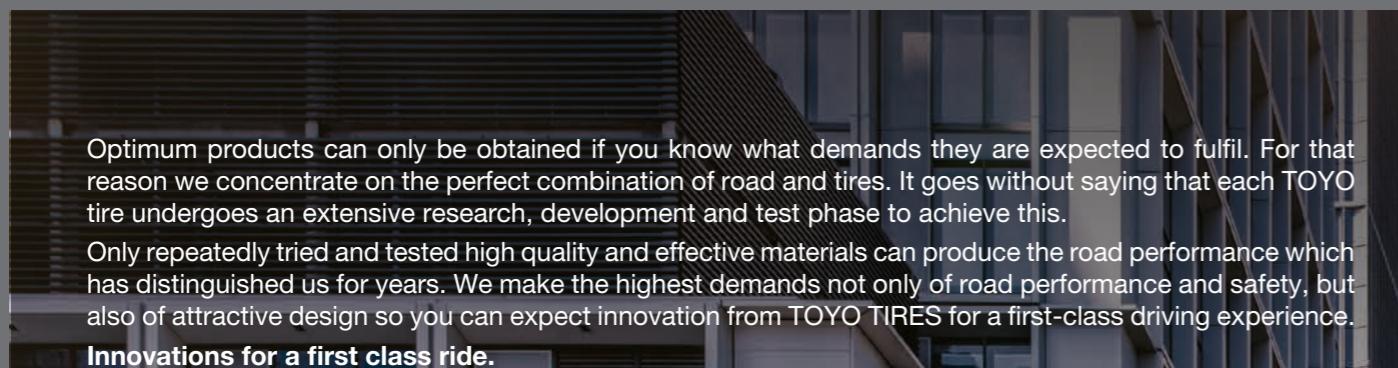

Shallow tread grooves and wide tread blocks on the tire's outer shoulder offer exceptional handling on dry roads.

Short, shallow tread grooves on the inner shoulder provide excellent steering stability.

Proper care of tires increases road safety and tire life.

Key Advice:

Air Pressure

Your safety depends on maintaining the prescribed air pressure. Always follow the recommendations of the vehicle manufacturer unless you have specific written advice from a tire maker.

A tire driven on with insufficient air pressure is a serious safety risk. The increased deformation of the casing leads to excessive heat build up which can result in sudden tire failure. Additionally wear will increase especially in the shoulder area of the tread necessitating premature removal.

Over inflated tires will have reduced road performance and inferior shock absorption. Additionally, wear will increase in the centre of the tread leading to premature removal.

Most important points (recommendations):

1. Measure air pressure on cold tires (before driving).
2. Air pressure must correspond to axle load (see operating instructions).
3. Air pressure must be kept equal across an axle.
4. Check air pressure at least once per week.
5. Check air pressure before each long trip and increase by 0.2 bar, so that the tire temperature can be kept low at high speed.
6. Air pressure for M+S tires should be 0.2 to 0.3 bar higher than the corresponding summer tires.
7. After checking air pressure always refit the valve caps, as they prevent dust and dirt from entering and compromising air tightness. Valve caps with a sealing ring are best, as they act as a secondary air seal assisting the tire valves.

Tire Sizes

The vehicle registration documents often show the tire sizes a vehicle should be supplied with. Taking into account axle load and maximum speed (incl. variation) care should be taken that the tires have the necessary load and speed index. In the case of V/W/Y tires the maximum load deduction (for V max > 210/240/270 km/h) must also be taken into account.

Loads

Like insufficient air pressure, vehicle overloading can lead to premature wear and tire failure. The vehicle registration documents may detail among other things the maximum kerbside weight of the vehicle in kilograms as well as the maximum axle weight in kilograms for the front and the rear axles. Overloading can easily occur when going on holiday with a full car, roof rack and/or caravan.

Speed

The tires fitted by a vehicle manufacturer have the appropriate speed symbol considering the maximum speed. It is possible to switch to the same tire size with a higher speed index, but tires should never be substituted for tires with a speed symbol equal to less than the maximum speed of the vehicle (incl. variation).

Exceptions are M+S radial winter tires: in this case, care must be taken not to exceed the speeds indicated by the symbol on the M+S tire. Vehicles capable of higher speed than M+S tire speed symbol indicates, must have a notice, visible to the driver indicating the maximum speeds of the M+S tires. In some countries this is a legal requirement.

Speed Symbol	J	K	L	M	N	P	Q	R	S	T	U	H	V	W	Y	(M)
Maximum Speed km/h	100	110	120	130	140	150	160	170	180	190	200	210	240	270	300	OVER 300

For applications outside the range of the Y speed symbol, the service conditions (including the actual speed capabilities, load capabilities and the relevant inflation pressure) for vehicle characteristics will be agreed between the vehicle and tire manufacturers when using ZR marked tires with a service description within brackets, for example "(95Y)".

All uses of Performance characteristics in this catalogue are displayed as a guide only, to allow comparison with other products of the same category. Their purpose is to help select the most appropriate tire. No guarantee of performance can be inferred from these characteristics.

All Toyo brand tires are subject to continuous development. While every effort is made to describe goods and services accurately in this publication, no warranty is given as to accuracy and no responsibility will be accepted for any error or omission. TOYO TIRES reserves the right to amend the specification of tires without notice.
