## **PROXES T1 Sport SUV**

Proxes T1 Sport SUV was developed to offer ultra high performance for fast road SUVs.

A high driving position, offering commanding views of the road, combined with extremely high performance have made premium SUV's a popular alternative to the traditional executive saloon in Europe.

With excellent highway speed stability and precise handling on wet or dry roads, Proxes T1 Sport SUV answers the need for an Ultra High Performance tire for these executive cars.

## Tread Pattern Features

### Solid Inner Rib with Notch

- Improved braking
- Reduced irregular wear

### Wide Centre Rib

- High speed stability
- Improved handling response

### Wide Shoulder Blocks

- Increased contact area
- Improved handling and steering response

← **INSIDE**

Aquaplaning and braking Performance

**OUTSIDE** →

Cornering Performance

### Wide Circumferential Grooves

- Wide water channels
- Improves aquaplaning resistance

## Construction Technology

### High Stiffness Belt and Belt Reinforcement

- High speed stability

### New, High Hardness Silica Compound

- High speed stability

### Rigid Rayon Ply

- Directional stability
- Cornering ability at high speed

### High Hardness Bead Filler

- Quick and linear steering response

## Tread Compound

Silica

Special bonding Agent

Polymer

Carbon

A special bonding agent increases the interaction between all the compound elements to reinforce bonds for higher compound rigidity during cornering and braking.
